TITLE: Method for summing binary numbers. Class 42, No. 176724

SOURCE: Byulleten' izobretenii i tovarnykh znakov, no. 23, 1965, 61

TOPIC TAGS: binary number, binary logic

ABSTRACT: This Author Certificate presents a method for summing binary numbers. To speed the summing process, two words are formed: the sum of the absolute values of the two initial terms and the conjunction of the initial terms with a shift of one digit to the left. The like digits of the resulting words are split into groups so that groups of the first type are bounded on the right by the combination $\frac{1}{1}$ and on the left by the first combination $\frac{0}{0}$, and the remaining digits form groups of the second type. The final result is obtained by inverting those digits of the first word appearing in groups of the first type and summing

ABSTRACT : Observations were carried out on 68 patients with circulatory disturbances of the I, II and III degree, which developed as a result of valvular defects and atherosclerotic cardiosclerosis. Eryside (E) was administered intravenously in 40% solution of glucose, once daily. As a result of the treatment with E, the speed of blood flow was accelerated in 23 patients, in 25 cases it

Comparison of data obtained as result of treatment of fresh and septic-metastatic forms shows that better effect obtained in treatment of fresh cases, since septic-metastatic forms had less expressed effect. Most effective preparation in the observations was sulfidine, which occupies major place in treatment of brucellosis.
